AutoCAD mobile apps are available for iOS, Android, and other operating systems, including Windows Phone, macOS, and Windows 10. A free version, AutoCAD LT, is available for use on mobile devices. AutoCAD Web is a cloud-based version of AutoCAD that runs on a remote server. Like other cloud-based platforms, AutoCAD Web provides an interface between the user and the company's servers. AutoCAD Web also provides a connection between AutoCAD and the larger, global AutoCAD community. AutoCAD LT is only available on mobile devices. AutoCAD is the world's leading 2D and 3D vector graphics software used by hundreds of thousands of professionals worldwide. It has a variety of tools and features, including drafting, design, animation, 3D modeling, rendering, and other functions. In 2009, the program was used for an average of 800,000 hours of work per day. CAD is an acronym for computer-aided design, which refers to the process of taking a 2D drawing and building it into 3D. CAD software enables designers to create drawings of 2D models using a combination of technical and artistic knowledge. AutoCAD is still a commercial product; however, the company plans to make it freeware starting on October 15, 2015. It will initially be available for Windows 10 and Windows Server 2016 (preview version) only. The company will continue to offer a Pro version for current owners of AutoCAD and for new users. The latest version of AutoCAD, the latest release of AutoCAD 2013, is bundled with Windows 10. AutoCAD is compatible with Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows Server 2008, and Windows Server 2012. Other operating systems compatible with AutoCAD include macOS (10.4 or later), OS X (10.5 or later), and Unix/Linux. AutoCAD can be operated on a variety of hardware, including the IBM PS/2, IBM/PC, HP/2000, Apple II, Apple Mac, and the Mac Plus. The program also works on most business-oriented Android and iOS devices, as well as Windows Phone and Windows 10 tablets. AutoCAD LT is not supported on mobile devices. Since its introduction, AutoCAD has been updated on a regular basis with new features, and has had several versions.

Command line AutoCAD includes command line tools. Several command line options can be used to submit an item to be retrieved. These include: mvr, mvrcat, mvrcatl : look up an item based on name. mvrtdt, mvrtdtc : look up an item based on type. mvrtdtcl : look up an item based on class. In addition, the command line API allows developers to submit items to the database in batch mode or in one-off transactions. Intermittent percutaneous microbubble administration enhances revascularization in acute myocardial infarction. The purpose of this study was to evaluate the effect of percutaneous intermittent administration of microbubbles in the treatment of acute myocardial infarction. Transcatheter microbubble delivery has shown promise in the treatment of peripheral arterial disease. We used sonography to monitor reperfusion in nine open-chest dogs after 90 minutes of coronary artery occlusion. An osmotically driven catheter pump delivered single or multiple percutaneous injections of air-filled microbubbles (diameter, 1-5 microns) through the arterial access. The microbubbles were delivered intermittently after reperfusion had been established. The dogs were divided into four groups: two groups that received one injection of microbubbles (group 1) or five injections of microbubbles (group 5) after reperfusion was documented by contrast injection, and two groups that received intermittent injections of microbubbles for a total of three or five injections (groups 3 and 5). The efficacy of microbubble delivery was determined by measuring the mean number of perfusion defects in the 5b5f913d15

Cerebral venous thrombosis (CVT) is an uncommon cause of stroke in childhood, and the associated etiological factors are difficult to identify in children. We present a retrospective study in 10 children with CVT (age range: 7-17 years; mean 14 years) diagnosed in our centre over a period of 10 years. Two children were affected by dehydration and were admitted for 5 and 7 days, respectively. A third child suffered from a hyperextension injury of the neck. In one patient, CVT was secondary to a complex partial status epilepticus. In another child, CVT occurred because of intracerebral haemorrhage in a long-lasting sickle cell anemia. CVT was diagnosed by magnetic resonance imaging in 6 children. In 2 children, CVT was diagnosed by magnetic resonance imaging and colour-coded duplex scanning (CCDS). CVT can be diagnosed by magnetic resonance imaging in children with or without neurological symptoms; the prognosis depends on the aetiology and on the association of intracranial hypertension. Rep. Bill Pascrell Jr. (D-N.J.) challenged President Obama to release his birth certificate on NBC's "Today" show, but Obama is now scheduled to answer questions from members of the public in a White House press conference on Monday. "If [he's] not here to answer the question, I think we should be more careful about taking him at his word," Pascrell told NBC's Ann Curry when asked why he challenged Obama to release his birth certificate. Pascrell said Obama must release the document to show that he is who he says he is. "We're entitled to that," Pascrell said. "If he's not going to do it, we're going to ask more questions. It'
