

Food File is an easy-to-use software utility that has a built-in database with numerous foods, giving you the possibility to study their nutritional values and, hopefully switch to a healthier lifestyle. It contains over 7500 food items spread across 24 good groups, offering support for filters, sorting methods, and a search function. The app can be seamlessly figured out by all types of users, whether or not they have previous experience with such programs. Hassle-free setup and user-friendly interface After a speedy installation operation that shouldn't give you any trouble, you are greeted by a classical-looking window with a neatly organized structure, where you can start exploring the food groups. These focus on baby foods, baked or beef products, beverages, breakfast cereals, cereal grains and pasta, dairy and egg products, fruits and fruit juices, lamb, veal and game products, fats and oils, soups, sauces and gravies, spices and herbs, sweets, and so on. Explore food groups, nutritional facts, and pie charts You can select one or more groups to check out their containing food kinds, as well as select a type to find out typical nutritional values, such as calories, protein, carbohydrates, fat and saturates, fiber, sodium, and water. Apart from showing numerical figures, the application also compiles these values in a pie chart. Detailed nutritional content is available for those who want to learn about cholesterol, calcium, beta-cryptoxanthin, folic acid, iron, lycopene, magnesium, phosphorus, retinol, saturated fatty acid, sodium, sugar, fat, along with vitamins A, B6, B12, C, E and K, among others. Print data and search for food types Moreover, Food File mentions some food facts, such as whether or not the food is low fat, has high sugar content, or has low sodium content. Although the app doesn't integrate options for copying this data to the Clipboard or exporting it to file, it lets you print it. As previously mentioned, you can resort to a search function to track down a particular kind of food. Furthermore, you can filter foods by nutrients (e.g. fat free, high fiber, low fat, low sodium), as well as sort them by any criterion listed in the details nutritional content area. The utility also lets you add personal notes and look up additional information on the developer's website. PROS: • Easy-

Keymacro is a full-featured multilingual macro recorder and text generator. You can use it to record your favorite keyboard shortcuts, document or web site navigation paths, and streamline repetitive tasks. It also generates pre-written commands that can be played back at a later time, and can be used as an add-on to personalize and personalize your web browser. Keymacro can record the input of single letters and words, entire web pages, entire documents, URLs, websites, and of course entire workflows. It can be launched at any time by typing its name in the Windows Start Menu or with a hotkey combination. Record, Copy, and Paste Functions: Keymacro lets you record and save your favorite sequences of actions that you repeat daily. It does so by recording your inputs of single characters and words, entire documents, URLs, web sites, and entire workflows. Keymacro has text selection, text copy, text paste, and selection/copy to clipboard support. It can create custom hotkeys that can be saved in the app and used to launch the application or a website. Keymacro makes a great multilingual recorder for use with the most popular text editors and browsers. The app automatically saves your recordings with a translated name for the language of your choice. It also supports converting recorded text and web page navigation paths to web URLs, as well as un-wrapping them. Typing and Navigation Path Support: Keymacro lets you record custom typing shortcuts for documents, web pages, and web sites. It records a sequence of text and text selection elements that represent the navigation path for the site or web page. It also supports recording a sequence of custom hotkeys for opening web sites or web pages and navigating between the pages. Generates, Encodes, and Translates: Keymacro lets you easily create custom commands that can be used to streamline repetitive tasks. The app lets you generate pre-written commands with the same sequence of text and text selections that you record, and it can encode and translate the custom commands to your language of choice. Hotkey Support: Keymacro can record hotkey sequences for launching the app, web sites, and browsers. The custom hotkeys that you record are also saved in Keymacro for launching and navigating to web sites and web pages. Support for Browsers: Keymacro supports all major browsers. The app records the input of single characters and words and 1d6a3396d6
