SplitFile is a software utility to split large files into several smaller ones, and vice-versa. To do so, the user can choose to split the file based on its size, or by the number of units selected (for instance, based on KB, MB, GB or TB). Submitted: 2016-07-13 Category: Name: Submission time: Version: Platform: Panther is an application manager which allows you to organize and access your applications easily. It's a tool which can be used to save disk space, and you can simply disable unwanted apps. You can also create your own installation rules. The intuitive user interface makes it easy to organize your apps, search for them and launch them. Plus, you can organize apps into categories to make it easier to find what you need. Furthermore, you can change the order in which your apps start up and enable them to automatically restart. Another interesting feature of Panther is the "Create Installation Rules", which allow you to create shortcuts or custom settings for your apps. You can also use Panther to backup your important data in case of a disaster. Plus, Panther supports ISO images (it also enables you to mount them), and it allows you to schedule the backups. The software's support for Linux is extensive. Plus, there are many different preset installation rules, and you can create new ones. Also, the application's license key can be purchased directly from its website. Unfortunately, there is no help file available, and the user interface is in need of improvement. We strongly recommend this application to all users. Description: Panther is a utility to organize your applications. It's a simple to use program which you can use to manage your applications and its components. It's powerful, intuitive and can be used to add apps to your favorites list. Submitted: 2016-07-13 Category: Name: Submission time: Version: Platform: Paper Clip is a tool to help you manage and sort email. It provides a convenient and simple interface to set up your email client. The user interface is intuitive and the application is fully integrated. Plus, Paper Clip is customizable. First, you can configure your email client. Plus, you can set filters, such as the recipients, sender, and the subject, and, if you are using multiple email accounts, you can create a custom filter.
